

METHOD OF ENABLING A REMOTE COMMUNICATIONS DEVICE WITH A
TELEMATICS FUNCTIONALITY MODULE

Abstract of the Disclosure

5

Method of enabling a remote communications device (106) with a telematics functionality module (150) can include providing a docking apparatus (114) coupled to interface with a vehicle (109). The remote communications device is communicatively coupled to the docking apparatus, wherein the remote communications device is non-enabled

10 with a telematics functionality module (150). The docking apparatus and the remote communications device enable the remote communications device with the telematics functionality module.
